Highly skilled and experienced experts can identify hidden issues before they manifest into problems. Many customers soon recognize these individuals as trusted advisors who can add value throughout their payments infrastructure. As a result, Premium Customer Support customers frequently stay current on all new releases, enabling them to leverage new product functionality and/or adopt new mandates and regulations rapidly. Finally, Premium Customer Support provides a cost-effective way to add new functionality, as it will be delivered by those who best know your implementation, leading to lower cost and shorter duration deployments.

ACI's Premium Customer Support program helps customers maximize the performance of ACI systems while ensuring an attractive return on investment. Dedicating engineers and consultants to a customer provides continuity and ongoing expert support. To help achieve a successful experience, we encourage customers to participate in regular executive review meetings in which priorities are updated, previously selected metrics are reviewed and the program is openly discussed with ACI executives and the value delivered. These meetings ensure alignment and, ultimately, customer satisfaction and loyalty.
