

FEATURES AT A GLANCE

COMPREHENSIVE

- Offers real-time visibility into end-to-end payments system health
- Provides a single view across all transaction, database and network data using a single application and custom, intuitive web interface
- Tracks, alerts and enables troubleshooting across the entire application and infrastructure, ensuring optimal uptime, performance and decision-making

ACCURATE

- Integrates seamlessly with Postilion[®], providing complete, holistic, end-to-end visibility
- Enables operations, technology and business users to make fast, accurate, data-driven decisions

EFFICIENT

- Ensures high visibility with little to no impact on Postilion payments system performance
- Automates alerting and notification based on pre-defined rules, no programming required
- Eases compliance via automated service-level monitoring

PROGNOSIS FOR POSTILION

REAL DATA FOR REAL DECISION MAKING

Prognosis for Postilion[®] is a real-time monitoring application that seamlessly integrates with Postilion to provide critical visibility into your entire payments environment. It lets you:

- **Simplify processes**, providing end-to-end visibility and customized, automated alerts and dashboards, no programming required
- **Make fast, accurate business decisions** by providing a single view of the truth, enabling both technical and business users to work from the same data and make faster, better decisions

PROGNOSIS
FOR POSTILION®
PROVIDES THE
BROAD VISIBILITY
AND DEEP DATA
INTELLIGENCE YOU
NEED TO RESPOND
QUICKLY TO
MARKET CHANGES.

GOOD DECISIONS REQUIRE GOOD DATA

In the payments business, every second counts. To succeed, you need to make well-informed, data-driven business decisions — well before the competition knows what's happening.

In this environment, traditional business intelligence tools that take weeks to sift through data and identify last month's trends are of little help. You need real-time tools that provide broad visibility and actionable intelligence to make the right decisions, at the right time, all the time.

ACTIONABLE INTELLIGENCE FOR THE REAL-TIME WORLD

Prognosis for Postilion is designed specifically to address those needs. A full-featured, end-to-end event management system, it provides real-time monitoring of your entire payments ecosystem, including the underlying infrastructure. Its automated alerts/rulesets and intuitive, customizable web interface provides your entire organization — business users and technology staff alike — with the broad visibility and deep data intelligence they need to respond quickly to market changes, improve cost-efficiencies and reduce downtime.

GAIN BUSINESS-SPECIFIC, REAL-TIME INSIGHT

Prognosis for Postilion integrates seamlessly with your Postilion payments system and provides unprecedented visibility across your transactions, database and network. With its intuitive web interface, even users with no programming expertise can build customized dashboards to automatically track and alert on events specific to their needs. For example:

- **A card product manager** can watch the progress of a marketing campaign in real time, gain and make modifications on the fly to increase profitability or program acceptance.
- **An operations manager** can track system performance, receive automated alerts when performance dips, and immediately drill down to identify potential causes and rectify the issue.
- **Line-of-business managers** can monitor day-to-day profitability or key account performance and immediately see when problems occur. Easy, intuitive dashboards enable them to see and solve issues before they adversely affect customers.

ALWAYS MAKE CONFIDENT, ACCURATE BUSINESS DECISIONS

Prognosis for Postilion provides your operational, technical and business users with the real-time payments system information they need to make the right decisions at the right time.

It quickly uncovers problems before they become critical, even in the most complex environments, enabling you to:

- Recognize and act on market-changing events as they occur
- Reduce the downtime across your payments environment
- Place resources exactly where they're needed, when they're needed

With Prognosis for Postilion, you always have the accurate, actionable data you need to confidently make right decisions for your payments business, in real time, all the time.

ACI Worldwide, the Universal Payments (UP) company, powers electronic payments for more than 5,100 organizations around the world. More than 1,000 of the largest financial institutions and intermediaries, as well as thousands of global merchants, rely on ACI to execute \$14 trillion each day in payments and securities. In addition, myriad organizations utilize our electronic bill presentment and payment services. Through our comprehensive suite of software solutions delivered on customers' premises or through ACI's private cloud, we provide real-time, immediate payments capabilities and enable the industry's most complete omni-channel payments experience.
