- Payment processing with real-time fraud prevention backed by expert analysts

SIMPLE

- With a flexible and simple integration for seamless payments across all channels

ACI[®] SECURE eCOMMERCE[™] SOLUTION FOR ACQUIRERS

ACI BUILDS INNOVATIVE PAYMENT TECHNOLOGIES

OWN THE ENTIRE MERCHANT RELATIONSHIP

The challenge for many acquirers today is that they are connected to multiple legacy eCommerce payments gateway systems. Legacy systems lack the flexibility needed for the changing requirements of global merchants. As a result, many acquirers cannot rapidly adapt to changing market trends and are burdened by higher maintenance, development and operational costs. Increasing competition in the acquiring space has led to declining margins for acquirers, forcing them to compete for merchants based on value-added services rather than just price. Acquirers who can offer a “one-stop” payments solution can reduce attrition from merchants looking to both streamline their eCommerce operations or extend into new markets.

ACI BUILDS INNOVATIVE PAYMENT TECHNOLOGIES THAT DRIVE SUCCESS

The ACI Secure eCommerce solution delivers the ultimate in simplicity, global connectivity and security. Through a single integration to a unified RESTful Open API, merchants gain access to the largest global payments network. The industry-leading payments gateway technology enables merchants to build payment apps and features directly on the platform.

THE ACI® SECURE eCOMMERCE™ SOLUTION

The ACI® Secure eCommerce™ solution enables acquirers to take advantage of powerful transaction processing capabilities. ACI's integrated payments gateway (full white-label gateway or the expansion) and fraud management solution includes a global network of hundreds of local and cross-border card acquirers and alternative payment methods, with a feature-rich suite of payment processing, mobile solutions, integration and onboarding, as well as advanced business intelligence tools.

PROVIDE FASTER TIME TO MARKET WITH ACI'S PAYMENTS GATEWAY

Acquirers integrate through a unified, RESTful Open API to ACI's payments gateway enabling faster time to market for domestic and international expansion, reducing merchant attrition and increasing revenue from existing customers while attracting new ones. Innovation is the core of the ACI Secure eCommerce solution, and developing technology that drives your success is our focus — enabling acquirers to expand their business with an end-to-end, omni-channel payments solution. One single integration point combines our unified, RESTful open API architecture, responsive platform, bundled value-added services and self-service developer portal to ensure flexibility and lower IT setup costs.

PROTECT HARD-EARNED REVENUE WITH ACI'S FRAUD MANAGEMENT

Fraud is a constant threat in eCommerce and shoppers now engage with merchants through more channels and payment methods than ever before. On top of that, they demand ever-faster order fulfillment both within and across borders. As a result, fraud prevention is more complex and fraught than ever before. To protect and grow business online, acquirers need to offer their merchants a fraud prevention and risk management solution that is closely tailored to their individual needs and capable of adapting rapidly. The ACI Secure eCommerce solution includes real-time fraud management capabilities that enable acquirers and merchants to protect revenues, support growth and enhance shoppers' eCommerce and mCommerce experiences — so that shoppers get to pay anytime, anywhere and on any channel.
