Payment intermediaries, including traditional processors, payment service providers and new fintech entrants, are in a race to win market share and stay ahead of global competition. Faced with growing cross-border transactions and alternative payment methods, the requirements to effectively compete are increasingly complex as real-time payments become a reality around the world.

Industry participants must keep pace with evolving technology and customer demand, while tightly managing heightened fraud risk and balancing their systems' operational costs and scalability.

PAYMENT INTERMEDIARIES REQUIRE SIMPLE, EFFICIENT SOLUTIONS TO EVOLVE WITH MARKET CHANGE AND DISTINGUISH THEIR BUSINESS APART FROM THE COMPETITION.

ACI delivers next-generation payment systems with solutions that drive rapid innovation and intelligent fraud prevention, while enabling customers to maintain the best of their existing infrastructure. Payment providers leverage our any-to-any enterprise payments approach for global eCommerce solutions and real-time payments. ACI Universal Payments™ technology is flexible and easily configurable to help customers differentiate their products and services and efficiently drive business growth strategies.

ADVANCED FRAUD PREVENTION STRATEGY AND INTELLIGENCE

Today's increased speed of commerce and choice of payment methods within and across borders increase the risk of fraud. ACI offers an enterprise fraud approach addressing all processing points in real-time with sophisticated solutions for card-present and card-not-present environments. Best-in-class analytics, profiling and scoring methods enable continual evaluation of critical data to further prevent losses and refine risk strategy. Leveraging a global database of the most up-to-date financial crime trends and teams of specialists, ACI gives customers an edge in their fight against fraud.

SIMPLIFY RETAIL PAYMENTS PROCESSING

Processors are faced more and more with cost challenges from silo'd systems and customization projects as they strive to keep pace with customer demands. A fragmented approach to delivering new services creates inconsistencies across channels and hinders future innovation initiatives. ACI streamlines all retail payment types to enable processors to drive efficiencies and improve margins. The Linux/x86 platform dramatically reduces transaction processing costs, and with SaaS deployment options, ACI assures the rapid speed to market that's required to remain competitive.

EMBRACE IMMEDIATE PAYMENTS AND FUTURE PAYMENT DISRUPTIONS

Immediate payments make funds instantaneously available to the payee party of a money transfer. This payment method is addressing customer expectations and changing the way money moves around the world. Competitive payment providers are acting now in order to capitalize on the opportunities for new market share and prepare for volume growth.

ACI's proven solution provides a completely secure environment in which customers can quickly address immediate payments requirements while also laying the foundation to meet future disruption and regulation, such as blockchain, open APIs and PSD2. This approach enables flexibility to address new opportunities and positions payment players ahead of future competitive threats.
