## CREATE NEW PRODUCTS, IMPROVE CUSTOMER EXPERIENCE

ACI's SWIFT gpi solution is an add-on module for Money Transfer System that fully supports gpi services through:

- **Rule building and automation:** Define standard or custom rules to identify and validate if payment originators, customers, as well as originating and receiving banks, are gpi-eligible. Includes the unique, permanent gpi identifier (UETR) in the message header and immediately routes the payment, ensuring same-day funds receipt. If payments are non-gpi-eligible, they automatically fall back to traditional SWIFT rules and are routed accordingly.
- **Revenue generation:** Create differentiated pricing for FX rates and fees for gpi services through automated processes
- **Transparency:** Ensures the 140-character remittance data required by SWIFT is complete and sent with every gpi transaction. All gpi-eligible participants can access their gpi transaction-related data — including origination, intermediary, fees/rates, settlement times and receipt confirmations — quickly and easily via SWIFT's cloud tracker service.
