

ACI Digital Central Infrastructure

ACI Worldwide®

The single solution to **enable, transform, and grow the real-time payments ecosystem.**

Central banks investing in real-time payments infrastructure today can help shape their country's financial future. ACI Digital Central Infrastructure supports that goal with a platform designed to operate on the central bank's terms, at sovereign scale, and backed by experience from deployments worldwide.

**10+ emerging market
central bank deployments**

Sovereignty and governance

You own the scheme. We provide the world-leading solution and support.

10+ national central bank deployments operating under this model

Central bank governance retained throughout

ISO/IEC 27001 certified data handling

Proven at scale

Real deployments. Real volumes. Real central banks.

ACI Digital Central Infrastructure powers national schemes processing hundreds of billions in transaction value

Deployed across Americas, Europe, Middle east, Africa, and Asia-Pacific

Reference sites available; peer-to-peer central bank conversations on request

Implementation teams with direct experience of legacy-to-live migration

FUTURE READINESS

Built for what comes next, not just what's needed today.

- ISO 20022 native from day one
- Open API architecture enables overlay services without core changes
- Settlement layer allows for support for CBDC integration as a future option
