

ACI® Issuing™, powered by RS2

Issue, manage, and scale card programs with a flexible, secure platform.
All card types and schemes, global and local.

- Unify credit, debit, prepaid, and loyalty on one consolidated platform
- Launch faster with out-of-the-box market certification and robust APIs
- Operate with the control, security, and resilience required in regulated payments

 Built for growth Accelerate time to market and easily expand into new markets. Launch new products through configuration, not heavy custom development, without sacrificing card nuance.	 Built for security and compliance Reduce operational and compliance burden. Simplify scheme certification and PCI DSS scope with a certified platform. Reduce audit effort with consistent, repeatable processes.
 Built for resilience and scalability Scale without complexity on a proven, high-volume authorization and processing engine. Deployment flexibility for data residency and operational needs.	 Built for control and autonomy Leverage strong APIs and streamlined integration with existing payment ecosystems. Minimize operational cost, support efforts, and dependency on external processors.

Capabilities at a glance

 Launch-ready by design Out-of-the-box certification readiness and configuration-led setup. Supports rapid launch of new card programs and full platform control.	 API-first integration Connectivity across channels, partners, and orchestration layers through APIs.	 Card lifecycle management Card issuing, management, and program servicing across all products and customer segments.	 Authorization and processing Real-time, high-volume transaction processing with proven performance.
 Security and controls Role-based access, audit trails, maker-checker, built-in risk controls, and security tooling.	 Global operations and scheme connectivity Multicurrency accounts and multilingual experiences. Support for global networks and local payment schemes.	 Operations portal Administrative tools for product configuration and program management. Parameterization of fees, promotions, hierarchies, and user management.	 Customer experience White-label, self-service tools, including a dedicated cardholder app.

One platform. More control.
Faster growth.

Modernize your issuing stack with a globally trusted platform designed for scale, flexibility, and security.
