ACI Worldwide®

ACI Connetic® and Red Hat OpenShift

Cloud-native payments deployed your way

Modernizing payments without forcing one deployment model

ACI Connetic, through its partnership with Red Hat OpenShift, helps financial institutions modernize payments with the flexibility to deploy across private, public, and hybrid environments. The partnership provides banks with added confidence as they evaluate cloud-native deployment strategies.

Why banks care

Challenge	What ACI Connetic provides
Payments modernization	A platform that supports change without disrupting critical services or dictating the pace of change
Deployment strategy	Deployment flexibility across private, public, and hybrid environments
Resilience requirements	A modern platform built to support mission-critical payment operations and reduce transformation risk
Regulatory pressure	Greater control over and support for infrastructure strategies aligned to regulatory requirements
Long-term transformation	The flexibility to introduce new services, adapt to changing requirements, and bring innovations to market faster

ACI and Red Hat: Building on an established relationship

Year	Milestone
2023	ACI and Red Hat announced collaboration around Red Hat OpenShift to support payments modernization and cloud deployment flexibility.
2024	ACI joined the Red Hat partner ecosystem to support deployment of ACI's enterprise payments platform across cloud infrastructures.
2026	ACI Connetic partner validation on Red Hat OpenShift provides the next proof point in the relationship.

Why the partnership matters

Banks want the benefits of cloud-native technology without being forced into a single infrastructure model. Red Hat OpenShift provides a consistent Kubernetes-based platform across on-premises and cloud environments. Combined with ACI Connetic, it enables a practical approach to payments modernization while preserving flexibility over where, how, and at what pace critical workloads are deployed.

The partnership brings together ACI's payments expertise and Red Hat's open hybrid cloud platform. For banks, the value is a clearer path to modernization that can align with operational, regulatory, and infrastructure requirements, while creating a foundation for future innovation and growth.

ACI Connetic + Red Hat OpenShift

Challenge	What ACI Connetic provides
Flexible deployment	Support for private, public, and hybrid cloud strategies
Modern payments architecture	A unified, cloud-native payments platform
Operational consistency	Provides a consistent platform across deployment environments with Red Hat OpenShift
Modernization without disruption	A phased approach that allows capabilities and payment flows to be introduced over time
Future-ready infrastructure	A foundation that supports continued change as payment and technology requirements evolve

ACI and Red Hat: Building on an established relationship

ACI Connetic provides a cloud-native payments platform that enables banks to modernize payments on their terms, with the flexibility to deploy in line with their technology, risk, and operational strategy. Validation on Red Hat OpenShift reinforces a cloud-native approach that balances innovation, resilience, and control.
